PROJECTS

1. MedQPro | A Healthcare QMS Software

Basically, this is India's first JCI and NABH Compliant healthcare QMS Software. In this project, I worked on the Patient Feedback, Patient Complaint, and Survey Management Module, and for more details we shall discuss.

Maharishi College of Natural Law (CHSE), Bhubaneswar

Senior Secondary (Pre-Engineering) (Science)

Percentage 59% / 100%

Aug 2015

- like daily attendance, half-day or full-day or leave features have been added, as statement/report generated date-wise.
- Tech Used: WAMP Stack, HTML5/CSS3, Bootstrap, JavaScript, PHP, Ajax, MySQL.
- SEE LIVE: <https://vbs.theuniqueculture.com>

4. Assets Management Software

- Basically, there will be an admin panel in which the admin can manage all the Lettings details, Tenant details, Landlord details, and Contractor details.
- Admin is able to generate the Tenant, Landlord, Contractor, and commission statement date-wise like inventory features.
- Used: WAMP Stack, HTML5/CSS3, Bootstrap, JavaScript, PHP, Ajax, MySQL.
- SEE LIVE: <https://www.ukrmoffice.com>

5. SahajIndia | Document Generates

- This is an Easier Document generation platform that generates different Documents like PAN cards, loan-related, and Insurance-related with multi-step progress.
- In this project, I have added Razorpay Payment Integration, Mail Function, Dynamic Progress bar, User Dashboard, Admin Panel, and Invoice Receipt Generator.
- Used: WAMP Stack, HTML5/CSS3, Bootstrap, JavaScript, PHP, Ajax, MySQL.
- SEE LIVE: sahajindia.in .

6. Mident Billing Software

- Basically In this management app, there will be a super admin and admin panel in which the super admin is able to manage all the details but the admin only manages their respective product billing details with Mail and SMS integration.
- Used: HTML5/CSS3, Bootstrap, JavaScript, PHP (CodeIgniter), Ajax, MySQL.
- SEE LIVE: <https://mident.co.in/>

- Tech Used: WAMP Stack, HTML5/CSS3, Bootstrap, Angular, JavaScript, PHP, Ajax, MySQL, Git.

2. Bhitarkanika National Park | A Booking App

Basically, this is a room booking web app. In this project, there will be an admin dashboard, In that panel admin is able to manipulate all room prices, availability, and Inventory details, and also the calculation part has been done for different adults and children.

- Tech Used: WAMP Stack, HTML5/CSS3, Bootstrap, JavaScript, PHP, Ajax, MySQL.
- SEE LIVE: <https://booking.bhitarkanikanationalpark.com>

3. Visitor Billing Staff Management Software

- In this Software, there will be two major modules i.e. Manager and Admin.
- Visitor records will be stored like when they came and left with generated a statement/report date-wise, The Recurring Billing part will be there with the inventory system and staff management functionality has been added
